Jakarta, Indonesia

Frontend Developer with 3 years of experience specializing in financial technology, including custom payment gateway systems and internet banking platforms. Skilled in React.js, Next.js, and TypeScript, with a strong background in frontend development, API integration, and secure deployment. Proven ability to build reliable, high-performance financial applications that enhance user trust, streamline transactions, and deliver production-ready solutions.

Work Experiences

PT BrillianN Nuswantara Bhagawanta - Jakarta Sep 2024 - Now

Frontend Developer

- Engineered and supported a custom payment gateway system using Next.js.
- Implemented secure authentication and transaction workflows, ensuring compliance with financial standards.
- Optimized frontend performance, resulting in faster load times and a smoother checkout experience.
- Built a reusable React.js component library, accelerating feature development and maintaining UI consistency across projects.
- Partnered with QA teams to diagnose and resolve critical bugs, improving overall system reliability.

Project: Payment Gateway

PT Infosys Solusi Terpadu - Yogyakarta Feb 2022 - Sep 2024

Frontend Developer

- Developed and maintained a finance web platform using React.js and TypeScript, ensuring high stability and scalability.
- Collaborated with UX/UI designers to deliver responsive, interactive pages, enhancing customer engagement.
- Integrated RESTful APIs and third-party services to enhance functionality and streamline data interactions.
- Built a reusable React.js component library, accelerating feature development and maintaining UI consistency across projects.
- Partnered with QA teams to diagnose and resolve critical bugs, improving overall system reliability.
- Collaborated with Quality Assurance teams to identify, troubleshoot, and resolve bugs, ensuring a seamless user experience.

Project: Internet Banking, Internet Busines Banking

UPT TIK UPN "Veteran" Yogyakarta - Yogyakarta Dec 2020 - Mar 2021

Internship

- Designed and developed an Inventory Management System using Django, enabling staff to track and manage assets more efficiently.
- Deployed the system on a VPS (Ubuntu) with Nginx and PM2, ensuring smooth operation and reliable uptime
- Authored deployment and configuration documentation, simplifying future maintenance and onboarding for new staff.

Project: Inventory Management System

Education Level

Universitas Pembangunan Nasional Veteran Yogyakarta Aug 2017 - Jan 2022

Bachelor Degree in Information Systems, 3.51/4.00

- Thesis: Software Product Quality ISO/IEC 25010 Analysis on the Development of ECommerce Information Systems Book Sales at DapurKata Publisher.
