

MUHAMMAD LUQMANUL HAKIM

FRONTEND DEVELOPER

+6289633189921 | luqmanul0612@gmail.com | <https://linkedin.com/in/luqmanul0612/> | <https://luqmanulhakim.site> | Jakarta, Indonesia

Frontend Developer with 4+ years of experience building financial technology products, including custom payment gateways and internet banking platforms. Proficient in React.js, Next.js, and TypeScript, with hands-on expertise in API integration, secure transaction workflows, and scalable frontend architecture. Passionate about delivering reliable, high-performance applications that meet financial industry standards and provide a seamless experience for end users.

Work Experiences

PT Mandiri International Technology

Frontend Developer | Operational Bank System | Jan 2026 - Present

- Developed and delivered new features for an operational banking system using React.js, collaborating within a cross-functional development team.
- Optimized frontend performance through code-splitting and bundle optimization, resulting in faster load times and a smoother user experience.
- Built and maintained reusable React.js components, ensuring UI consistency and accelerating feature development across the team.
- Partnered with QA teams to identify, troubleshoot, and resolve bugs, maintaining overall system reliability.

PT Briliann Nuswantara Bhagawanta

Software Engineer | Payment Gateway | Sep 2024 - Jan 2026

- Built and maintained a custom payment gateway system using Next.js, covering end-to-end transaction flows including checkout, reconcile, and settlement.
- Implemented secure authentication and transaction workflows, ensuring compliance with financial standards.
- Worked closely with backend and product teams to align frontend behavior with payment service requirements and business logic.
- Built a reusable React.js component library, accelerating feature development and maintaining UI consistency across projects.
- Collaborated with QA teams to diagnose and resolve critical bugs, maintaining a stable and trustworthy payment experience for end users.

PT Infosys Solusi Terpadu

Frontend Developer | Internet Banking · Internet Business Banking | Feb 2022 - Sep 2024

- Developed and maintained a large-scale internet banking platform using React.js and TypeScript.
- Translated UX/UI designs into responsive, interactive, and cross-browser-compatible interfaces with high attention to detail.
- Integrated RESTful APIs and third-party financial services to power core banking features such as fund transfers, account statements, and bill payments.
- Built and maintained a shared React.js component library across multiple banking products, improving development consistency and reducing delivery time.
- Implemented secure user authentication and transaction authorization flows, including OTP validation and session timeout handling.
- Partnered with QA teams to reproduce, triage, and resolve high-priority bugs, ensuring platform stability and a smooth user experience.

Education Level

Universitas Pembangunan Nasional Veteran Yogyakarta

Aug 2027 - Jan 2022

Bachelor Degree in Information Systems, GPA 3.51/4.00

- Thesis: Software Product Quality ISO/IEC 25010 Analysis on the Development of ECommerce Information Systems Book Sales at DapurKata Publisher.
